timeXtender and SwiftKnowledge in Mutual Partner Alliance to Provide Agile BI

timeXtender, a leading provider of Business Intelligence (BI) tools, and SwiftKnowledge, LLC, a global provider of web-based Business Intelligence software, today announced a BI partner alliance.

timeXtender and SwiftKnowledge, LLC, have entered an agreement that enables organizations to acquire an entire Business Intelligence solution based on timeXtender's visual ETL, data warehouse, and cube-building tool, and SwiftKnowledge's web-based analytics solution.

"We are excited about this new alliance. The Business Intelligence market is ripe for change - customers are looking for BI tools that focus on empowering non-technical users and providing immediate value." said Heine Krog Iversen, CEO of timeXtender. "The combination of timeXtender and SwiftKnowledge ensures that our partners can meet these demands."

"End users no longer need to use haphazard work-arounds to get the data and reports they can't get through their traditional BI applications." said Matthew Connon, Chief Operating Officer of SwiftKnowledge. "Customers and partners alike will benefit from ease of use and immediate access to all the data and reports they need, and from rapid deployment and the ability to make changes easily."

About SwiftKnowledge, LLC

SwiftKnowledge, LLC is a global software provider of powerful, patented business intelligence (BI) technology delivering a breakthrough experience for business users which drives strategic metrics and enables better decision-making throughout an organization. The SwiftKnowledge BI platform enables a new era of easy-to-use BI applications offering a revolutionary, ad-hoc analysis experience in web time and with a zero-footprint web deployment; with its patented Interactive Data Streaming™ (IDS) and Component-Level Security™ (CLS), SwiftKnowledge provides unmatched performance, scalability and security. The company's unique approach and support for cloud computing-based deployments and applications provides a robust yet sustainable solution for organizations integrating BI into operational applications; seeking an easy-to-use tool for heavy, ad-hoc BI workloads; and operating within the limitations of constrained IT resources.
