Touchstone Group Announces OEM Agreement with timeXtender

Touchstone Group, one of the UK's largest suppliers of integrated business software and business consultancy services, and timeXtender®, a leading international ETL and data warehousing software provider, today announced an OEM agreement that significantly extends Touchstone's business intelligence (BI) offerings for Infor10 Financials Business (SunSystems).

Touchstone's ETL Agile powered by timeXtender® rapidly extracts, transforms, and loads data from SunSystems and other operational systems into a data warehouse and dimensional cubes. When combined with a wide range of Reporting, Data Visualisation, Dashboard and BI Tools, it delivers true business insight accessible to everyone in the organisation. ETL Agile's rapid and flexible technology is a low cost solution that can reduce the time it takes to implement a BI solution by as much as 80%.

"Our customers have a wealth of information stored in multiple systems such as SunSystems, Procurement, CRM and their line of business applications", said Keith Birch, CEO of Touchstone Group. "They require BI solutions that can aggregate, structure and present their data accurately and consistently. It also needs to be delivered in a more robust and reliable way than they currently experience with multiple complicated and unsecure spreadsheets. Adding timeXtender's powerful technology into our SunSystems solution portfolio means we can quickly and costeffectively help our customers deliver the benefits of BI to their organisations."

"We are extremely excited about our partnership with Touchstone Group and look forward to a long, successful relationship," said Jørgen Grønlund, Global Account Manager at timeXtender. "Our approach is to offer the most advanced agile ETL and data warehousing technology available to our OEM partners, and this is also the case with Touchstone Group. This OEM agreement underlines the opportunities timeXtender offers to partners and customers across the business software solutions spectrum."
