## Danish-American BI-alliance

**The new Danish-American product symbiosis will provide an essential part of a number of pre-built BI solutions targeting SMB's using Microsoft's ERP and CRM solutions.**

Danish timeXtender and U.S.-based Strategy Companion have entered an agreement that allows organizations to acquire a complete BI Suite comprising timeXtender's visual data warehouse and cube-building tool and Strategy Companion's web-based Analyzer front-end, enhancing corporate performance management, reporting and analytics.

The new Danish-American product symbiosis will provide an essential part of a number of pre-built BI solutions targeting SMB's using Microsoft's ERP and CRM solutions. The solutions are called "QuickCubes powered by timeXtender". Using QuickCubes, organizations gain the benefits of a technology proven pre-built BI solution as well as an extraordinary ease of customization and maintenance.

Analyzer is a zero-footprint, web-based Business Intelligence front-end providing great functionality and ease-of-use. A pervasive price model guarantees no additional cost for end-users, making the model very price-competitive. Strategy Companion's front-end solution is used by organizations of all sizes, including global Fortune 500 companies such as BNP Paribas, Honda Motor, Microsoft, Bayer and Eli Lilly.

timeXtender's flagship product, timeXtender 4, extracts, consolidates and validates disparate data from various IT sources, building cubes and loading data into a data warehouse - creating a solid foundation for every BI solution. The process is automated and proven up to 80% less time-consuming. In 2008 timeXtender was awarded Microsoft ISV Partner of the year in Denmark for making a relatively complex task incredibly simple.

Both timeXtender and Analyzer are sold through a network of trusted partners around the world. Our partners have the specific BI knowledge and experience to provide our customers with the consulting support they need.
